Part 1. An opportunity arises. What would you do?

Me. I'm a tomato farmer. I've added high-tech monitoring and data collection to my operations and am excited to see the benefits of data science to my business. I've started collecting data about my tomatoes.

You. Data scientist who was referred to me as somebody who might be able to help me take my tomato business to the next level.

Scenario. This is our first meeting to discuss the project. Do what you would normally do in this type of situation.
